8 May 1956

MEMORANDUM TO: Contracting Officer

SUBJECT: Film Requirements

1. On 5 May 1956 the operational film requirements for the period June through December 1956 were developed as indicated in the attached schedule.

2. This determination was made jointly by the Director of Operations, Contracting Officer and Director of Materiel.

3. The totals indicated in the attachment should be reflected against any current orders outstanding with Eastman thus reflecting a true net requirement.

4. Future projections will be forthcoming as soon as operational experience is obtained and can be used as a basis for more accurate forecasts, keeping in mind the forecasting lead time necessary to extend the current projection.

<u>Interpretation</u>	<u>Channel 1</u>	<u>S-Band Channel 2</u>	<u>S-Band Channel 3</u>
*Approaching	[Redacted]		1431 to end of copy at 1435 new signal up at 2 seconds/rotation (possibly height finder) Also V-Beam signal in background weak. This portion will require broader similar plott- ing for resolution by seam types.
1435-End of copy			

REMARKS:

- (1) Same as on Mission #1006.
- (2) The 15-minutes of calibration tones are very confusing since both channel 2 and 3 tones appear on both channels. Assumption was made that last tone on each was correct.
